

The CamTower is a remote-controlled, telescopic lifting column, which moves the camera at a variable speed of up to 1.3m/s in a vertical direction.

The tower is computer controlled, providing the operator soft deceleration at the top and bottom of the tower's range, which avoids any abrupt stops.

This precision makes the system particularly quiet and smooth.

The CamTower S can also be mounted on a dolly to make extensive movements on tracks or a studio floor.

SPECS

Max Payload (Head + Camera)	40 kg (88.18 lbs)
Max height	3 m (9.84 ft)
Min height	1 m (3.28 ft)
Vertical Travel	2 m (6.56 ft)
Lift speed	1.3 m/s (4.27 ft/s)
Total weight	60 kg (132.28 lbs)
Weather Proof	Yes
Joystick Control	Yes
Pedal Control	Yes
Dolly	Option
Remote Head Mounting Base	Elemac, Mitchel, Custom
Inverted	Yes
Wireless	No
