

**MOVIE DOLLIES**

The Panther Evolution is the standard among film dollies. The hydraulic column operates very smooth and delivers maximum stability. High-end wheels and PDC tracks provide the most stable travel-shots. Accessories like snake, low-bowl, U-Bangi, low-base platform, risers and super-jib II are all available to make the most extreme shots. The arms are retractable, to operate in very tight spots. On a studio-floor you can use this dolly on hard wheels, switchable between 2 and 4-wheel steering.

## specs

Lengte	84 cm
Min breedte	53,5 cm
