

The AGITO has been developed as the only fully modular dolly system capable of working free roaming. Combining AGITO Sports with our V-Con Pro or tower and our Shotover G1 enables complete freedom of movement.

Perfect for use in the studio or on location, AGITO Sports offers a new way of moving a camera, with complete flexibility using our growing arsenal of modules and accessories, and an ease of operation not available with any other system.

The tower takes the AGITO to new heights by adding jib movement. With a stroke of 70cm the TOWER gives adjustable camera heights up to eye level. It can be remotely controlled by the MASTER through the use of foot pedals

- Speeds of up to 56 km/h and as low as 1cm/sec
- Four wheel drive with independent adjustable suspension for all terrain use
- Encoded motor system for highly accurate movement
- Repeatable movements through the Master Controller
- 3 steering modes: '2 Wheel', '4 Wheel' and Crab
- 4 types of wheels available: Monster, Dolly, Standard and Ice Wheels
- Multiple wheel options available for increased flexibility
- Combine with a wide range of existing remote camera heads
- Sports bundle comes in just 4 custom cases, weighing under 32kg each
