

As an electric vehicle, the EZ Raider is almost totally silent. The vehicle is steered via handlebars like a jetski. The electric ATV EZ Raider can be operated over inhospitable terrains, thanks to its unique, field proven characteristics:

- Innovative, patented suspension system which gives the EZ Raider unrivaled maneuverability
- Compact and lightweight design
- Powerful electric motors with efficient torque ratio
- Precise response to user commands for easy handling
- Unique ground clearance and vehicle angles

EZ Raider – A 4x4 wheel-drive which creates traction and power. Meant for extreme navigation capabilities such as sand dunes, deep mud and snow. One of this vehicle's main advantages is that it can drive slowly and even stop in difficult terrains. Also, this is a vehicle with impressive towing capabilities and stairs climbing. Weighs only 135 kg and contains a 60V/3000W-hr. battery and 4 powerful hub motors of 1200W each. On a single charge, the EZ Raider travel distance is up to 75 km.

## specs

VEHICLE DIMENSIONS AND WEIGHTS	
Weight	130 kg
length	1.70 mtr.
Height	1.35 mtr.
Width	0.74 mtr.
Wheel diameter	0.56 mtr.

BATTERY	
Type	Lithium-ion
Total Voltage	60 Volt

ADDITIONAL FEATURES	
Reverse gear	
2 USB ports	
Rear red light	
Front white light	
Thumb throttle	
On/Off switch	
integrated parking brake	

SUSPENSION	
Front and rear suspension travel of 50cm	
Triaxial suspension	

FITTED FOR	
Shotover G1	
Flighthead Mini 4	
Flighthead CL	

DRIVELINE	
4x4 wheel drive	
hub Motor / DC brushless	

GENERAL SPECS	
Max useful payload	170 kg
Max speed	45 kph
Max range	75 km
Towing capacity	190 kg
Max climbing capacity	30 deg.
Ground clearance	24 cm

TIRES/WHEELS	
Standard Tyres	
Off Road Tyres
