

The Ronford-Baker Fluid 7 head is designed for use with film or video/EFP cameras. Its two sealed fluid units allow control to be varied through seven stages, from a cushioned free movement to the heaviest control required, by the use of three simple on/off levers. Both pan and tilt actions are continuous through 360 °, depending on the length of the lens and camera.

specs

Totaal gewicht	8 kg
Max camera gewicht	25 kg
Connectie	Bowl / Mitchell
Bowl diameter	150 mm
Pan limiet	360 °
Tilt limiet	360 °
Roll limiet	360 °
