

**REMOTE HEADS  
WITH CAMERA**

The camera offers full HD broadcasting and SD / HD images and is configurable remotely. Cam-Ball 2 is fully weatherproof and can be any length of time outside in all types of weather. The Camball can be mounted in both directions. Through slip rings the Camball is capable of continuous 360 degrees of pan.

Wide angle converter can be easily attached to the camera. All camera functions can be controlled remotely by our RCPs. This camera is widely used in many high-end programs.

The console provides the operator the ability to simultaneously serve different Camballs by means of a joystick.

99 preset positions can be stored and recalled. This includes: Pan, Tilt, Zoom and Focus for each preset. These positions, and all camera settings are automatically stored in a memory.

Also communication over long distances is possible with or fiber connection!
