

This pan-tilt head is “the beast of burden” in our spectrum of heads. The Mambo is a home manufactured remote head and can be fitted under just about any crane. It fits also on the Sam-Dolly, the Speed-cam, fixed riggings etc ... This head proves to be very reliable and robust though it is one of the lightest in his range.

The head can be optionally equipped with a wider U-bracket for 3D rigs. On request it can also be implemented to a switchbox to operate 8 heads by using just 1 joystick.

Also communication over long distances is possible with or fiber connection!

specs

Lengte head	45 cm
Breedte head	20 cm
Hoogte head	76 cm
Max snelheid	180 °/s
Totaal gewicht	12 kg
Pan limiet	+/- 1440 °
Tilt limiet	+/- 180 °
Besturingen	Joystick, Wheels
